

Hints from the Cabinet Master™

Volume 10

#3250 Locking Shelf Support

Sometimes you have a shelf you need to adjust constantly, but need to lock down when in position. Not a problem, for this kind of locking shelf support! In this issue of Hints from the Cabinet Master™, we will show you how to install this kind of locking shelf support.

Instructions:

Measure location of 1/2" shelf. Put a mark on the side of the cabinet where the bottom of the 1/2" shelf will rest. Place the shelf bearing area by the mark, and mark the location of the peg. Drill a 5mm hole, and press-fit the support. Repeat for the other supports. Press shelf down and lock in place.
