## #659 Drawer Slide Socket

Installing a drawer in your cabinet is easy, with drawer slide sockets! In this issue of Hints from the Cabinet Master™, we will show you how to install a drawer slide socket.

#### Instructions:

Insert rail into sockets, and place rails on drawer rails. Slide drawer into cabinet, and mark hole locations via drawer hole above or beneath drawer. Remove drawer from cabinet, and remove rails from sockets. Install sockets using marked hole locations with screws and staples. Insert rails into sockets, making sure to push them as deep as they will go.

Bainbridge #659 Drawer Slide socket available from:
